With this page the focus is on looking at a chart from both the exoteric and esoteric perspectives. It includes the dispositor (ruling planet) of the sign each planet is in in four systems, Traditional, Modern, Esoteric and Hierarchical; and the number of planets under each of the seven rays; the previous and next moon phase. Also included is an eclipse list, and the first two will be the prenatal lunar and solar eclipses for the chart.

When you add this page to Solar Fire, you will be able to use it to view any chart (using the house system of your choice, as well as either Tropical Zodiac or one of the Sidereal Zodiac options).

To use this page, you will first need to close Solar Fire, navigate to your Documents folder and into Solar Fire User Files. Then save the attached file. **Rulers.pag** into the Pages folder.

Once you have added this file to the appropriate folder, you can reopen Solar Fire. Now you are ready to use the new page.

To see a chart using this new page:

1. Access the Page Browser. The easiest way to do this is to open a chart by double clicking on it in the main screen.
2. On the right side of this chart, click the Pages button.
3. Since you just added the page to Solar Fire, click on the Added Recently Category on the left side of the Page Browser.
4. There, click on the page called **Rulers** and then click the OK button.

Your selected chart should now be showing in this **Rulers, Rays and Phases page**.
